

eyeP Communicator - Windows® edition

A new generation of
global VoIP communication

New...!
Windows 7 support
BroadWorks R16

eyeP Communicator is a new generation of VoIP communication - an innovative professional class of softphone, providing extensive customizable options, allowing your customer needs to be addressed precisely.

Superior quality

The eyeP Communicator delivers superior audio and video quality with its innovative Quality Engine, state-of-the-art algorithms and wide choice of codecs. Their combination results in crystal clear voice, and sharp video, combined with high quality of service.

Flexible

eyeP Communicator provides various optional packages allowing the most appropriate features to be composed according to customer needs, targeting both residential and business markets. eyeP Communicator is available in desktop or USB dongle versions. There is also a Command Line utility that allows control of the eyeP Communicator through the shell, facilitating simple integration with third-party applications straight out of the box. Tighter integration can be achieved through TAPI and eCom APIs.

Robust architecture

eyeP Communicator is built on a flexible and well-proven architecture, based on easily extensible plug-in components, all of which have been deployed by large telecom suppliers.

Easy !

eyeP Communicator is focused on Contacts, providing a single, simple interface to make calls, observe availability status, and send instant messages or SMS. eyeP Communicator can store your address book either in Microsoft Outlook® or the eCom database on your PC. Other networked address books can be supported. All contact information is then handled in one place, keeping your contact data always synchronized.

Solutions for:

Service Providers

- Quick rebranding
- Advertising banner
- Fully standards compliant
- Superior audio & video quality

Integrators

- Flexible and extensible software architecture
- Professional services
- Telecom robustness
- Fast & easy integration

eyeP Communicator interoperability with BroadSoft® Broadworks Server

A new generation of global VoIP communication

eyeP Communicator is proud to announce that it is certified to be interoperable with BroadSoft BroadWorks according to the 'Access Device SIP: BroadWorks SIP Access Device Interoperability' Test Plan.

Certified

The eyeP Communicator has successfully completed interoperability testing with BroadWorks R15 & R16 and is certified according to the 'Access Device SIP: BroadWorks SIP Access Device Interoperability' Test Plan.

The following table summarizes the features currently supported with BroadWorks. The full document, detailing the tests performed with BroadSoft, is available on request.

Next Directions

eyeP media is committed to furthering interoperability with BroadSoft and plans to support additional BroadWorks features in the next releases of eyeP Communicator.

GSMA Rich Communications Suite (RCS R2) features are already supported in the eyeP Communicator, and these will be tested with BroadSoft in the near future.
